

## **West Greeley Conservation District**

### **Livestock Well Drilling Cost Share Program**

#### *Provisions and Applicant Certification*

I would like to participate in West Greeley Conservation District's (WGCD) Livestock Well Drilling Cost Share Program. I understand and agree to the following terms:

1. All wells to be cost-shared must currently be on land within in the WGCD.
2. All wells to be cost shared must be approved by the WGCD, and be installed in accordance with the Natural Resources Conservation Service's (NRCS) standards and specifications, and be accompanied by an approved grazing management plan that enhances conservation needs of the land and/or district.
3. Landowners are responsible for obtaining their own State permits prior to construction. Landowners are also responsible for submitting a Well Test and Construction Report along with itemized bills once construction is complete.
4. No representation is made by WGCD as to the existence or non existence of underground hazards. Landowners are responsible for location of underground utilities, and supplying WGCD personnel with the UNCC reference number for the project, at least 2 days prior to construction. Utilities participating in Utility Notification Center of Colorado (UNCC) can be notified at 1-800-922-1987.
5. The minimum acreage of range/pasture to be serviced by the well shall not be less than 140 acres.
6. The district will cost share 50% (not to exceed the USDA's Weld County cost docket per foot) of the cost of the livestock well up to a maximum of \$5,000 per landowner. Any additional costs will be the sole responsibility of the landowner.
7. The well program is designed for livestock wells only. Therefore, if the use of the well changes within five years after the cost share payment is made, or if the land and well are sold, the landowner agrees to reimburse the district all cost share money received.
8. This cost-share only includes well drilling and casing, and does not include pipe or pump.
9. The landowner will be paid after the well has been installed and inspected by the District or NRCS, and submits a copy of their SSN or Tax ID and an itemized bill.
10. Applications are screened to determine eligibility.
11. If on CRP land, contract must expire within two years of application.
12. Program cost share will not exceed 100% of cost when used in combination of other programs or insurance payments.

I certify that I have read and understand the program provisions listed above.
