

Camp Rocky is a week-long residential camp for youth ages 14-19 who enjoy the outdoors and are interested in natural resources. The Professional staff helps participants learn about the environment through hands-on experiences. The students work in teams, making new friends from across Colorado. Each year, students choose a resource field for their area of study. Other activities include volleyball, hiking, campfire, group challenges, talent show and a dance.

Colorado Association of Conservation Districts

Outdoor Natural Resource Conservation Adventures Youth: Ages 14-19

57th Year Award Winning One Week Camp

Fish & Wildlife Management:

This team may track a radio collared animal, go electro-fishing, learn how wildlife adapt to their surroundings and complete a habitat enhancement project.

Rangeland Management:

This group learns about the “fitness” of the rangeland and the forage it provides.

Soil & Water Conservation:

Students learn about the primary components of the watershed. Study river system and learn about different types of soil.

Forest Management:

Learn about the different forest types, health of forests and how insects, diseases and fire affect trees.

Conservation in Action

Students will develop and present their group natural resource action plans.

They will use their group plan to complete a management project on the property with the guidance of their professional leaders.
